What do you believe government is for?

I believe government is for creating public infrastructure like roads and libraries - and ensuring basic needs like shelter and healthcare - for all of US.

Humans, we created government to coordinate and to make order among so many of US.

Government is often ruled by people with wealth and privilege, but it can be for all of US.

Government is a structure for people to serve each other and the common good, and it can be abused by a few people to control and punish the rest of US.

In 1948, leaders from around the world agreed government should serve fundamental human rights for all of US.
